MODERN ALUMINUM DOORS

K O B B E

MODERN DESIGN & AESTHETIC APPEARANCE

By choosing KOBBE doors, you choose the highest quality that combines advanced production technologies, carefully selected materials and reliable fittings. These doors were created with customers in mind, for whom every detail matters.

Our products stand out for their durability, aesthetics, unique patterns, and timeless design. With modern designs, a wide range of colours, and flexible configuration options, KOBBE doors perfectly fit your vision and space.

KOBBE is also about responsibility – the aluminum used in our doors is fully recyclable, helping to protect the environment. The exceptional thermal insulation of our products protects your home against heat loss, while the low heat transfer coefficient U_d ensures energy efficiency.

Our doors meet rigorous safety requirements - they comply with the RC2 anti-burglary certificate and work perfectly with modern smart home systems, offering not only protection but also comfort at the highest level.

BASIC EQUIPMENT

KOBBE PRESTIGE

Collection Alu Basic

Alu Basic is a series of aluminum doors with a minimalist, modern design. A simple form without glazing, subtle milling patterns, and stainless steel elements give them a unique charm.

Carefully selected fittings and elegant pull handles ensure durability and user comfort. This collection offers not only a wide range of RAL colours but also the possibility of sublimation, allowing for the effect of natural wood or raw concrete.

An ideal combination of simplicity, functionality, and style that perfectly enhances the character of your home.

Endless finishing and design possibilities

Thousands of colour options

Customizable milling patterns

Decorative stainless steel applications

Collection Alu Quartz

Available exclusively in Prestige series

The Alu Quartz collection is the quintessence of elegance and durability. The use of sintered quartz gives the doors a distinctive appearance inspired by natural stone, while ensuring resistance to damage, moisture, and daily wear. A perfect match for both modern interiors and raw, industrial spaces.

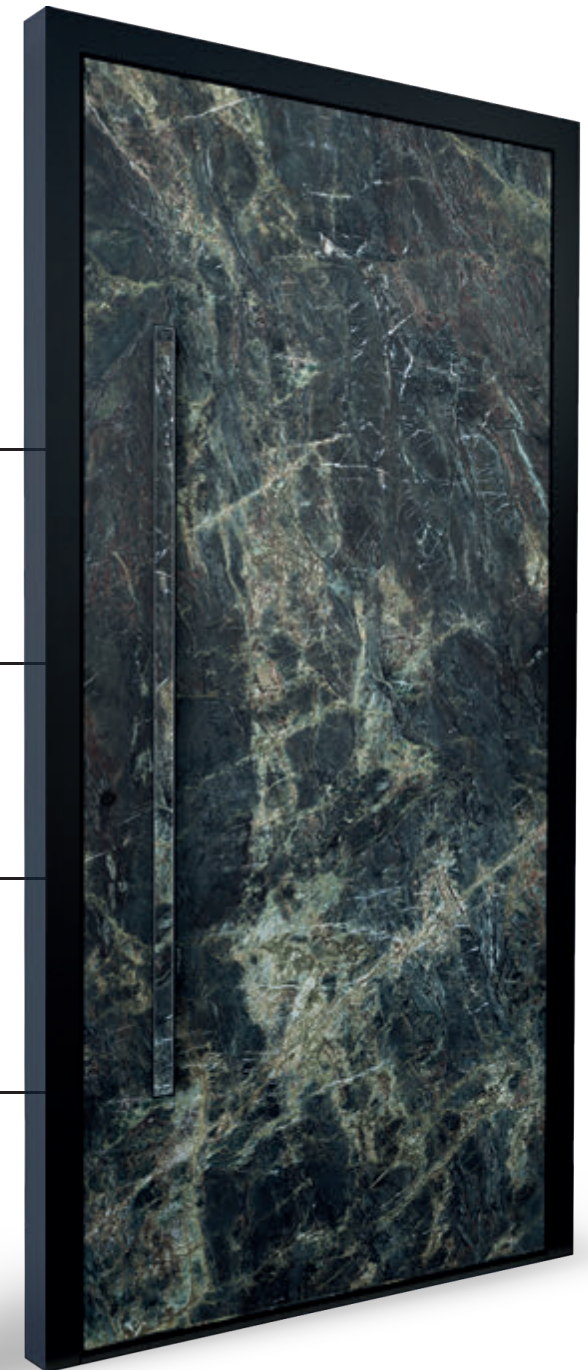

If you value design that impresses while remaining functional, Alu Quartz is the ultimate choice without compromise.

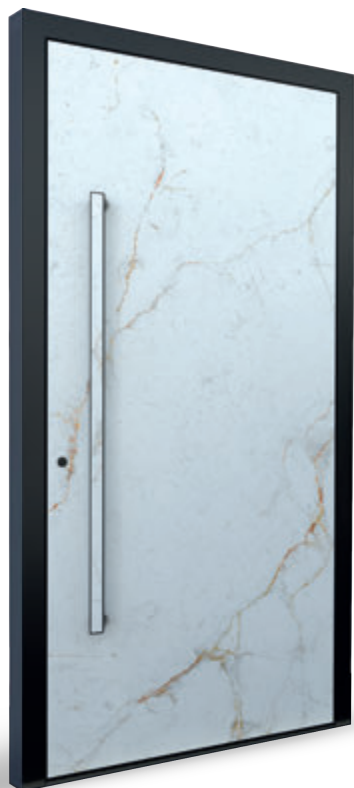

Unmatched durability and resistance to scratches and moisture

Luxury finish inspired by natural stone

Modern design - perfect for lofts and industrial interiors

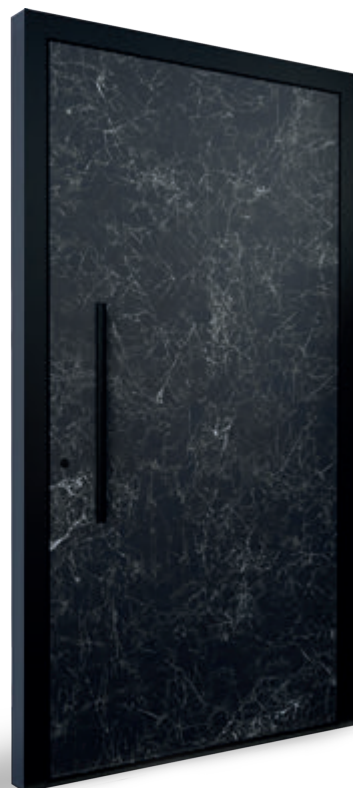

Precision in details and the highest quality craftsmanship

Collection Alu Lamell

Aluminum doors with wood-effect slats create a harmonious blend of aluminum's strength and the natural beauty of wood.

Perfectly suited for minimalist homes, these doors offer cutting-edge technology while maintaining a warm and inviting appearance. Precision craftsmanship, high-quality materials, and realistic sublimation ensure durability, functionality, and style.

Their timeless design seamlessly aligns with the latest architectural trends.

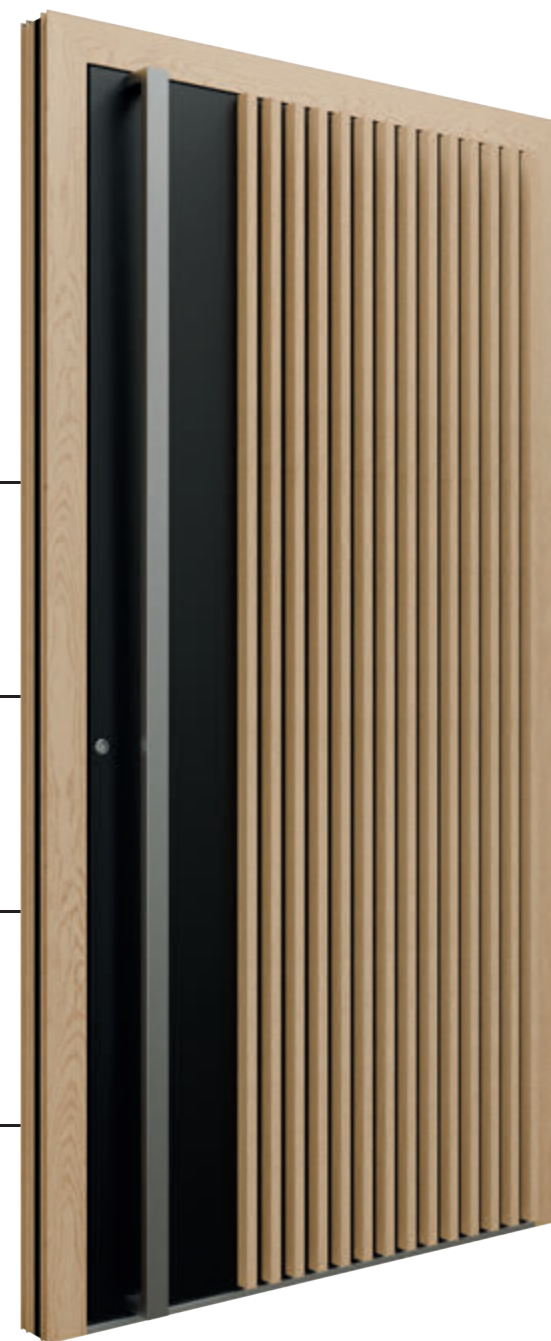

NEW

Realistic wood imitation combined with the durability of aluminum

An ideal solution for modern, minimalist spaces

Exceptional resistance to weather conditions and damage

Contemporary design inspired by natural aesthetics

Collection Alu Classic

The Alu Classic collection is designed for lovers of timeless English style. Elegance, tradition, and comfort - the defining elements of this unique design - are seamlessly combined with modern solutions, creating doors with unparalleled character.

Models from this series draw inspiration from the Victorian era and the charm of countryside living, offering classic forms that complement both traditional and contemporary spaces. Alu Classic is the perfect choice for those who appreciate a style that never goes out of fashion.

NEW

English style that catches the eye

A perfect harmony of tradition and modern solutions

Refined in every detail

A unique touch for your home

Collection Alu Side

The Alu Side collection is designed for multi-purpose use, making it ideal for side entrances to garages, utility rooms, or service spaces.

These doors feature a robust construction, ensuring long-lasting durability and resistance to daily use and changing weather conditions.

With a simple but elegant design, the Alu Side perfectly blend in with different styles, providing both a practical and aesthetic solution for your home.

Collection Pivot

The Pivot collection is a synonym for innovation and elegance, designed for the most demanding architectural projects.

Thanks to advanced door opening technology, it enables the creation of modern, impressive entrances that open up entirely new design possibilities for clients. We draw inspiration from prestigious lines such as Alu Design, Alu Xglass, Alu Quartz, and Alu Wood. Thanks to this, our doors combine a unique style, a variety of finishes, and functionality, offering unlimited design possibilities.

Pivot technology ensures exceptional durability and user comfort. Each door leaf can weigh up to half a ton, yet it remains light to operate.

The construction can be enhanced with sidelight and toplight openings, adding an even more spectacular character and adaptation to individual needs.

Innovative door opening solution

Huge doors, spectacular finishes

Choose from hundreds of patterns

Let some light in and consider installing a sidelight

Collection Pivot

The Pivot collection redefines premium door standards, offering constructions up to 3.2 meters high—twice the height of traditional doors, which typically reach a maximum of 2 meters. This makes Pivot doors an ideal choice for modern interiors and spaces requiring extraordinary solutions.

The increased height not only enhances the visual impact but also provides greater design flexibility and functionality. These doors create spectacular entrances, adding prestige and a unique character to any project at first glance.

Discover the possibilities of the Pivot collection and see how limitless space can transform any investment.

GLASS

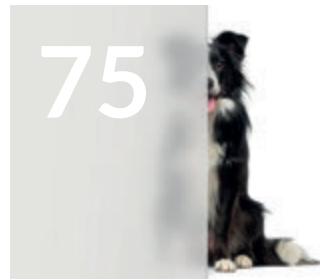

Glass in doors is not only functional but also a decorative element that enhances the style and character of the entrance. We offer a wide range of glazing options for both door panels and sidelights, allowing you to create a unique composition. Laminated safety glass available in various designs and finishes guarantees durability, aesthetics and comfort of use.

SIDELIGHTS AND TOPLIGHTS

Sidelights and toplights introduce more natural light and enhance the modern design of the door. As standard, they are equipped with a triple-glazed unit made of laminated safety glass, combining aesthetics with protection.

Available in widths from 300 to 1350mm (sidelights) and heights from 300 to 1000mm (toplights), they allow for perfect customization to meet individual needs.

In the Premium series, they can be bolted to the frame or integrated, while in the Prestige series, they are always an integral part of the structure, ensuring a seamless aesthetic.
